## Area of a Circle

Adapted by Neilor Tonin, URI 🔯 Brazil

## Timelimit: 1

The area of the circle is defined as  $A = \pi \cdot R_2$ , having  $\pi$  as 3.14159.

Calculate the area using the formula given in the problem description.

## Input

Read the variable  ${\bf R}$  (double precision), that is the radius of the circle.

## **Output**

Print the variable **A**, rounded to four decimal digits.

Sample Inputs	Sample Outputs
2.00	A=12.5664
100.64	A=31819.3103
150.00	A=70685.7750
